Professional Summary:

- Experienced Gen AI Data Engineer with over 4.5 years in the IT industry, currently spearheading Generative AI initiatives at PwC. Recognized for delivering impactful solutions through ETL optimization, cloud platforms, and advanced AI technologies like Agentic frameworks. Expertise spans end-to-end data lifecycle management, AI model development, and transforming complex datasets into actionable insights.
- Proficient in building custom GPT models (OpenAI, LangChain) and designing robust ETL pipelines (Azure Data Factory, Snowflake), and integrating AI-driven solutions with enterprise systems like Oracle and Workday. Adept at leveraging Python, Flask, FastAPI, and RAG to deliver scalable, high-accuracy solutions.
- Collaborative Agile practitioner with strong communication skills, committed to continuous learning and innovation in fast-paced environments.

Work Experience:

PricewaterhouseCoopers (PwC), Hyderabad, India

Sep 2024 - Present

Project: Workday Workbook Config – AI Factory

Role: Gen AI Developer

- Developed custom GPT-based data extraction orchestration tools leveraging **LLMs, RAG, Azure Document Intelligence, Azure Data Lake Storage, Python, and agentic frameworks**
- Engineered and deployed solutions for modules aligned with Workday configurations.
- Delivered solutions to business stakeholders and incorporated feedback for iterative improvements.

Project: Oracle Impact Analysis – AI Factory

Role: Gen AI Developer

- Develop custom GPT models using **OpenAI, FastAPI, LangChain, and Python/Flask** to automate enterprise workflows and enhance decision-making.
- Integrate AI solutions with Oracle systems, analyzing user prompts to identify impacted modules and deliver tailored responses.
- Implement RAG pipelines for document processing and use Langfuse/Datadog for monitoring, achieving 80% accuracy validated by Oracle SMEs.

Tata Consultancy Services (TCS), Hyderabad, India

Apr 2021 - Aug 2024

Project: Cashflow Analytics | **Client:** Xerox Corp

Role: Azure Developer

- Spearheaded ETL pipeline development using **Azure Data Factory, Snowflake and SQL** transforming bank statements data into actionable cashflow insights.
- Automated **data ingestion** processes, reducing manual effort by 50% and improving data refresh cycles.
- Orchestrated **data transformation** and **reconciliation** in Snowflake, aligning outputs with financial reporting standards.

Project: EFAP Subledger | **Client:** Xerox Corp

Role: Snowflake Developer

- Integrated sub-ledger data into **Snowflake, enabling real-time financial analytics** and forecasting.
- Developed backend data visualization reports, reducing report generation time by 30%.

Project: Chatbot - Ask Wilson | **Client:** Xerox Corp

Role: Technical Developer on Gen AI

- Built a chatbot using **Azure Open AI, Python, and JavaScript**, streamlining document retrieval and vectorization from Azure Blob Storage.

Technical Skills

- **ETL Tools:** Azure Data Factory, Talend, Synapse, Databricks
- **Cloud Platforms:** Azure (Blob Storage, ADLS), Snowflake
- **AI/ML Technologies:** OpenAI, LLMs, LangChain, LangGraph, RAG, Ollama
- **Programming Languages:** SQL, Python, JS
- **Web Technologies:** Flask, JS, HTML, CSS, FastAPI
- **Monitoring & Observability:** Langfuse, Datadog
- **ERP Systems:** Oracle
- **Version Control:** GIT, CI/CD
- **Methodologies:** Agile (Scrum, Kanban)
- **Testing:** Unit/Integration Testing

Certifications

- Microsoft Certified: Azure AI Engineer Associate
- Microsoft Certified: DP-900 (Azure Data Fundamentals)
- Agile Way of Working Foundation
- MFDM AI Certified

Education

B.Tech in Electronics and Communications Engineering(ECE)

Holy Mary Institute of Technology and Science, JNTUH University, Hyderabad | 2020
